CONTENTS

Volume 7, Issue Nos. 1–6

SOFTWARE—PRACTICE & EXPERIENCE

Issue No. 1, JANUARY–FEBRUARY

N. Wirth: Modula: a Language for Modular Multiprogramming 3

N. Wirth: The Use of Modula 37

N. Wirth: Design and Implementation of Modula 67

John van Meurs and Ernst Lopes Cardozo: Interfacing the User 85

Robert B. K. Dewar and A. P. McCann: MACRO SPITBOL—a SNOBOL4 Compiler 95

H. Wettstein: The Implementation of Synchronizing Operations in Various Environments 115

M. G. Richardson and S. J. Hague: The Design and Implementation of the NAG Master Library File System 127

H. S. Heaps and T. Radhakrishnan: Compaction of Diagnostic Messages for Compilers 139

Short Communications 145

Letters to the Editor 148

Book Reviews 149

Issue No. 2, MARCH–APRIL

Guest Editorial 155

Peter M. Neely: On the Use of Integer Arithmetic to Achieve Confirmably Correct Computation 159

Glenn H. MacEwen: A Simulation Sequencing Algorithm 165

Jan van den Bos and Hendrik-Jan Thomassen: COMLNK—a File Transport and Job Entry Utility for a Communication Link 173

David R. Hanson: Storage Management for an Implementation of SNOBOL4 . 179

George O. Strawn: Does APL Really Need Run-time Parsing? 193

R. J. Botting: Efficient Storage for Amorphous Data 201

I. S. Torsun and S. K. Robinson: Non-'Interpretive' FORTRAN Input/Output . 205

Thomas Plum: Fooling the User of a Programming Language 215
N. Bernstein and B. Knobe: A Non-general-purpose Operating System . . 223
D. G. Colquhoun: A Fast Approximation to the Sine Function 227
J. S. Rohl: Converting a Class of Recursive Procedures into Non-recursive Ones . 231
Robert F. Rosin: A Graphical Notation for Describing System Implementation . 239
B. L. M. Wyvill: PICTURES-68 MK1 251
B. E. Carpenter, R. W. Doran and K. Hopper: Non-recursive Recursion . . 263
Donald R. Innes: Exploiting the Least Recently Used Page Replacement Algorithm 271
Zavdi L. Lichtman: Interpretation Control Using A Linear Tree Representation . 275
John R. White and Richard K. Anderson: Supporting the Structured Development of Complex PL/I Software Systems 279
Short Communications 295
Letter to the Editor 297
Book Reviews 298

Issue No. 3, MAY–JUNE

S. K. Robinson and I. S. Torsun: Dynamic Analysis of Program Performance (DAP) in a Fortran Batch Environment 307
B. A. Wichmann: How to Call Procedures, or Second Thoughts on Ackermann's Function 317
D. Holdsworth: System Implementation in Algol 68-R 331
N. W. Dawes: A Simple Network Interacting Program's Executive (SNIPE) . 341
G. Hunter, M. Kuriyan and A. Wallis: The Advantages of Stream Output Procedures over Format-dominated Record Transmissions 347
Patricia R. Mohilner: Using Pascal in a Fortran Environment 357
Tony Storey and Stephen Todd: Performance Analysis of Large Systems . . 363
D. Coleman: The Systematic Design of File-processing Programs 371
L. R. Symes and R. R. Oldehoeft: Success and Failure Analysis of a Problem Solving System Implementation 383
Urs Ammann: On Code Generation in a PASCAL Compiler 391
Short Communications 425
Book Reviews 428

Issue No. 4, JULY–AUGUST

A. Ormicki: Real-time BASIC for Laboratory Use 435

J. Cohen and N. Carpenter: A Language for Inquiring about the Run-time Behaviour of Programs 445

P. M. Neely: Implementation Independent Arithmetic: Speculation for Discussion 461

M. H. Williams and A. R. Bulmer: Array Handling in Cobol Compilers . . 469

B. M. Leavenworth: Structured Debugging Using a Domain Specific Language . 475

R. H. Perrott and A. K. Raja: Quasiparallel Tracing 483

W. M. Gentleman and J. I. Munro: Designing Overlay Structures 493

N. E. Wiseman and P. Robinson: An Operating System for Interactive Terminals 501

J. Fitch: Profiling a Large Program 511

A. Thesen: The Evolution of a New Discrete Event Simulation Language for Inexperienced Users (WIDES) 519

Short Communications 535

Book Reviews 539

Issue No. 5, SEPTEMBER–OCTOBER

P. J. Brown: More on the Re-creation of Source Code from Reverse Polish . . 545

R. W. Witty: Dimensional Flowcharting 553

M. Kobayashi: A Set of Strategy-independent Restructuring Algorithms . . 585

A. L. Hillman and D. Schofield: EDIT—an Interactive Network Service; Design and Implementation 595

A. M. Lister and P. J. Sayer: Hierarchical Monitors 613

D. R. Hanson: RATSNO—An Experiment in Software Adaptability . . . 625

M. J. Rees and A. W. Oppenheimer: SOBS—An Incremental BASIC System . 631

J. M. Craddock: Planning the Software for a Personal Research Contract . . 645

O. Benediktsson: Sequential File Processing in Fortran IV. 655

Issue No. 6, NOVEMBER–DECEMBER

H. Abramson, T. Rushworth and T. Venema: TOSI: A Tree Oriented String Interpreter for the Design and Implementation of Semantics 663

M. P. Atkinson: IDL: A Machine-independent Data Language 671

J. Welsh, W. J. Sneeringer and C. A. R. Hoare: Ambiguities and Insecurities in Pascal 685

J. Hammond: BASIC—an Evaluation of Processing Methods and a Study of some Programs 697

J. P. Fitch and A. C. Norman: Implementing LISP in a High-level Language . 713

R. George: Eliminate Flowchart Drawings 727

M. J. R. Shave: The Simulation and Use of a TABLE Data Type 733

R. N. Fisher and G. W. McQuarrie: MPL1700—A High(er)-level Microprogramming Language 747

K. Ushijima: Steps to an Efficient Program for Floating-point Summation . . 759

I. A. Macleod: Design and Implementation of a Display Oriented Text Editor . 771

R. S. Scowen: Some Aids for Program Documentation 779

Short Communication 793

Letters to the Editor 796

Book Review 798
